

## TRI® Dental Implants Achieves EU MDR Quality Management System Certification

Switzerland, November 2024 - TRI® Dental Implants, a trailblazer in digital dental implant solutions, proudly announces its successful certification under the European Union Medical Device Regulation (EU MDR), validated by the Notified Body DQS Medizinprodukte GmbH. This certification underscores the company's unwavering commitment to maintaining the highest standards of safety, quality, and regulatory compliance in the development and production of its innovative technologies.

The EU MDR certification marks a significant milestone for TRI®, reinforcing its leadership in the dental industry by ensuring its cutting-edge products meet the stringent regulatory requirements for medical devices across Europe. By achieving this certification, TRI® strengthens its ability to revolutionize dental implantology through its disruptive innovations, offering enhanced peace of mind to dental professionals and their patients worldwide.

### Driving the Future of Dentistry with the matrix®

This achievement comes as TRI® continues to transform the dental implant market with its groundbreaking matrix® implant system. As the world's first dental implant without an abutment, the matrix® enables fully digital, cement-free restorations, ensuring a more streamlined workflow for clinicians and better outcomes for patients. The EU MDR certification ensures that TRI®'s pioneering technology complies with the most stringent safety and reliability standards, unlocking new market opportunities globally.

### A Testament to Swiss Quality and Innovation

"Achieving the EU MDR certification through DQS Medizinprodukte GmbH reinforces our dedication to Swiss precision, quality, and reliability," said Véronique Arnegger, Head of QM/RA of TRI® Dental Implants. "This certification isn't just a regulatory requirement—it's a reflection of our ongoing promise to provide high-performance products that improve outcomes for patients while empowering clinicians to embrace the digital future of dentistry."

### Shaping the Digital Future of Dentistry

TRI®'s compliance with the EU MDR further strengthens its position as a forward-thinking leader in digital dentistry. By proactively integrating the latest regulatory requirements into its processes, the company ensures that its products not only meet but exceed industry standards while continuing to drive innovation in dental technologies. TRI® remains committed to pushing the boundaries of implantology with its digital-first approach, blending performance with simplicity. This certification affirms its relentless pursuit of innovation while ensuring the highest levels of safety and efficacy for dental professionals and patients alike.
