Become part of our successful team! We are looking for a:

## **Verification & Validation Engineer (100%)**

### **Job Description:**

- Take responsibility for all GMP-relevant product and process verification and validation activities.
- Maintenance and improvement of the technical documentation of the TRI Dental Implant System, especially against the background of upcoming new MDR.
- Ensure compliance of the TRI® technical files with applicable regulations and standards.
- Drive continuously verification and validation process improvements
- Support new product development projects from verification and validation and regulatory perspective.
- Support quality management by creation of processes according to ISO 13485.
- Presentation of verification and validation activities within internal and external audits (e.g. from regulatory bodies)

### **Profile:**

- 5+ years of experience in related function in medical device industry.
- Experience with verification and validation activities of medical devices (e.g. cleaning, sterilization, packaging, biological evaluation, clinical evaluation...).
- Experience within a GMP regulated environment and GAMP requirements
- Excellent command of spoken and written English. German is a plus.
- Excellent MS office knowledge.
- Action orientation and strong ability and willingness to learn new things quickly.
- Good team player, proactive and pragmatic, with sound judgment and the ability to prioritize in a dynamic environment.
