

ONLINE WEBINAR

Advancing Full Mouth Restoration: The matrix[®] 3 on 6[™] No-Abutment Technique

February 13th | 4:30 PM PST

with Dr. Randy Roberts

Join Dr. Roberts for an in-depth exploration of the innovative no-abutment matrix[®] in combination with the 3 on 6[™] technique, a transformative approach to full mouth restoration pioneered at the Utah Smile Clinic. This exclusive webinar will delve into the technical and clinical intricacies of the matrix[®], providing a detailed understanding of how this groundbreaking procedure offers a permanent solution for patients seeking a complete smile makeover without the complications of traditional implants.

LEARNING POINTS:

- ✘ **Understanding the matrix[®]:** Learn the fundamental principles of the 3 on 6[™] technique, including its design and how it differs from traditional full arch restoration methods.
- ✘ **Clinical Benefits and Patient Outcomes:** Explore the clinical advantages of the matrix[®] Full Arch, such as reduced treatment times and enhanced patient comfort, along with the long-term outcomes for patients.
- ✘ **Case Studies and Applications:** Review real-life case studies demonstrating the effectiveness and transformation achieved with the matrix[®].

Dr. Randy Roberts

Dr. Roberts earned his DDS from New York University College of Dentistry and a Bachelor's in Biology and Business from Utah Valley University. He also received a master's degree from Harvard University. Dr. Roberts established Utah Smile Clinic and Smile Systems and is renowned for pioneering the 3 on 6[™] full mouth restoration technique, placing over 1,000 implants annually. As a leading expert and educator in dental implants and smile restoration, he is known for his conservative approach and focus on bone preservation.
