

ONLINE WEBINAR

REVOLUTIONIZING THE SINGLE TOOTH IMPLANT WORKFLOW: NO-ABUTMENT TECHNOLOGY UNLEASHED

with Dr. Azam Saeed DMD MA

July 31st
6pm Central Time

1 CE Point

ABSTRACT

Join us for a groundbreaking webinar where Dr. Saeed, in collaboration with TRI®, unveils the future of single tooth implant solutions with the pioneering **matrix®** technology. Discover how we're transforming the industry standard by eliminating outdated methods and embracing a fully digital, single-implant workflow. This session is designed for dental professionals eager to lead in dental implant technology and achieve superior patient outcomes.

LEARNING POINTS

- ✘ Place full zirconia restorations directly on the implant for unmatched aesthetics.
- ✘ Use the Digital Healing Collar Library for tailored healing abutments, enhancing patient recovery.
- ✘ Replace traditional methods with 3D printed, immediate tooth replacements.

DR. AZAM
SAEED
DMD MA

Dr. Azam Saeed is a distinguished general dentist and one of the nation's leading dental implant surgeons, renowned for his expertise in full arch rehabilitation and advanced surgical techniques. After earning his undergraduate degree from Benedictine University and his Doctor of Dental Medicine from Midwestern University, Dr. Saeed has spent over a decade transforming smiles and lives through innovative implant dentistry. He is the founder of a thriving full arch dental practice that treats nearly 100 arches each month in an 8,000 sq. ft. state-of-the-art facility, complete with an in-house digital laboratory. Under Dr. Saeed's leadership, the practice became the first in the country to be recognized as a certified Digital Excellence Center of America by Straumann. His center also serves as a hub for clinical education, welcoming doctors and their teams from across the nation to train in the latest digital workflows and surgical protocols. As faculty for the Full Arch Masters Advanced Surgery Course and ORCAA Surgical Training, Dr. Saeed is a leading educator in the field, specializing in complex procedures such as pterygoid, trans-nasal, and zygomatic implants. His passion for excellence and innovation continues to push the boundaries of what's possible in implant dentistry.
