COURSE CONTENT

Join our comprehensive dental course focused on All-on-4 and All-on-6 implant-supported restorations, utilizing no-abutment **matrix**[®] implant system. This training aims to equip participants with the skills to efficiently perform implantology and prosthodontics planning and treatment for full mouth rehabilitation with implant screw-retained full arch restorations. It emphasizes contemporary digital workflow, incorporating the latest advancements in dental technology.

Through a combination of theoretical lectures, hands-on workshops, and case discussions, our expert instructors will guide you through the step-by-step process of All-on-4 and All-on-6 procedures. You will gain in-depth knowledge of patient assessment, treatment planning, surgical protocols, prosthetic design, and post-operative care specific to these implants.

The course focuses on evidence-based practices, utilizing the most up-to-date research and clinical insights, while highlighting the unique features and benefits of the **matrix**[®] implant system. It places a strong emphasis on the contemporary digital workflow, allowing you to leverage cutting-edge technologies for improved treatment outcomes and efficiency.

Don't miss this opportunity to advance your skills in full mouth rehabilitation with implant screw-retained full arch restorations.

LEARNING POINTS

- ✘ Learn key principles and techniques for All-on-4 and All-on-6 restorations using **matrix**[®]
- ✘ Acquire skills in patient assessment, treatment planning, and post-operative care for full mouth rehabilitation
- ✘ Enhance proficiency in digital workflows for better outcomes in implantology and prosthodontics
- ✘ Master specific techniques like implant placement, bone grafting, and occlusal management
- ✘ Apply the latest evidence-based practices and research in your surgical and prosthetic procedures
