IN DAILY PRACTICE

Production Site Visit & One-Day Course

2026
OCTOBER 22-23

DR. MARCO ZELTNER

FULLY DIGITAL ABUMENT-FREE REVOLUTION

This intensive two-day experience is designed for clinicians ready to step into the next generation of implantology—fully digital, abutment-free, and built for true immediacy. Day 1 offers an exclusive production site visit, providing behind-the-scenes insights into TRI®'s manufacturing and innovation processes, and showcasing how Swiss precision and digital workflows come together in the **matriX**® system. Day 2 is a full intensive course focused on clinical application and hands-on experience. Participants will gain valuable insights into the **matriX**® abutment-free system and the latest digital trends. The highlight of the course: two live surgeries—one free-hand and one guided—demonstrating real-world approaches to single crown cases, grafting with Geistlich® materials, and seamless digital workflows. Experience the power of "Scan & Smile in 15 minutes", where implant placement and a temporary crown come together in one smooth, efficient process. Combined with hands-on sessions and live demonstrations of AI-driven design and 3D printing (SprintRay MIDAS), this course brings innovation directly into your daily practice.

HIGHLIGHTS

- ✘ Two live surgeries: free-hand & guided
- ✘ "Scan & Smile" – from implant to crown in 15 minutes
- ✘ Real-time grafting & single crown workflows
- ✘ Cutting-edge AI design & 3D printing in action
- ✘ Hands-on experience you can immediately apply
- ✘ Advantages of abutment-free solutions in immediate full-arch approaches
