

Breaking the Barriers with Game-Changing **NO-Abutment matrix[®]** Technology

Dr. Jack E. Wasserstein

August 8th | 5 PM PST

Join us for an exclusive webinar featuring Dr. Jack E. Wasserstein, where we dive into the groundbreaking advancements in no-abutment **matrix[®]** dental implants. Discover how to eliminate abutments and MUAs within your referral network and achieve full arch restorations with Scan & Smile[®] in just one hour. Don't miss this opportunity to enhance your practice with state-of-the-art techniques that guarantee efficiency and excellence for both you and your patients.

DR. JACK E. WASSERSTEIN

Dr. Jack E. Wasserstein, DDS, a distinguished figure in Periodontics and Dental Implant Dentistry, has dedicated over three decades to advancing dental health. Beyond his successful private practice in Valencia, California, Dr. Wasserstein

profoundly impacts dental education and community engagement. His involvement with various esteemed dental associations and the creation of Periodontist.org underlines his dedication to the dental community and public education. Dr. Wasserstein's passion for digital workflows is evident in his mastery of CAD designing with software like 3Shape and B4D, coupled with extensive experience in CAM processes manufacturing all variations of prosthetics in his in-house laboratory. An expert in integrating technology with clinical practice, he excels in enhancing dental treatments through digital innovations. Dr. Wasserstein is a respected lecturer in implant dentistry, passionately advancing dental practices and patient care.

LEARNING POINTS:

- ✘ Eliminating Abutments and MUAs:**
Learn the techniques to bypass traditional abutments and MUAs, reducing complexity and enhancing the effectiveness of your referral network.
- ✘ Speedy Restorations:**
Discover the Scan & Smile[®] within an hour step-by-step process, offering your patients a faster and more satisfying dental experience.
- ✘ Referral Network Integration:**
Incorporate the **matrix[®]** technology across a referral base practice, benefiting both specialists and patients.
